

ChatGPT: revolution or passing fad? 3/15/23

Technologies, especially artificial intelligence (AI), seem to be evolving faster than people are able to perceive their significance. This is still a hot topic not only in Hollywood but also in everyday life. AI tools are now being widely used by students and entrepreneurs who recognise potential uses of this technology. This growing interest has led to the creation of many tools of this kind, such as ChatGPT, Bing ChatGPT, Jasper, and Google Bard. This article explores the most popular and capable AI tool, ChatGPT, and its newest version, GPT-4, as well as looking at what it's capable of doing and what its limitations are.
