

Practical automation of accountancy (3/13/20)

Today's accountancy is moving towards a robotised future, as we are automating data exchange, data processing, and drafting of documents. It may seem that undertaking such automation requires some complex and expensive automation software, such as UiPath or BluePrism. That is not the case, though, as manual tasks can be automated with available tools without incurring any extra cost, but using those solutions requires at least a basic set of programming skills.
