Given the impact of Covid-19 on many companies, on 14 July the Cabinet of Ministers adopted regulations to allocate EUR 19.2 million in aid to companies in the tourism industry and EUR 51 million in aid to exporters whose financial position has significantly deteriorated as a result of Covid-19. The new rules will come into force on the effective date of the European Commission's decision on the compatibility of business aid with the EU internal market. This aid will be administered by the Latvian Investment and Development Agency, awarding it within the available finance allocation and by reference to the sequence in which aid requests are submitted. The aid will take the form of a grant aimed at helping companies pay wages and salaries.

Procedures for granting the aid

Applications are due by 30 September 2020. If any portion of the aid received remains unused for paying wages and salaries by 31 December 2020, the unused portion must be repaid. Only one aid may be claimed for the same cost. No aid is available to a company that faced financial difficulties at 31 December 2019 (e.g. was put into insolvency proceedings or legal protection proceedings by a court order).
